MODEL PGRM-SB2

NEW Floating Pool & Spa Alarm NEW Subsurface Detection

- The PGRM-SB2 functions are controlled by the units Red Key.
- Silent Installation and Removal Feature: By using the Red Key, The PGRM-SB2 can be installed or removed from your pool without the alarm sounding.
- Tamper Proof: If the Red Key is not used, the PGRM-SB2 will sound an alarm if it's removed from your pool.
- Constant Protection: Once the PGRM-SB2 is installed in your pool it is always on and cannot be turned off.
- Sleep Mode: The PGRM-SB2 must be removed from your pool when you swim. Use the Red Key to enter Sleep Mode and move the pool unit away from pool activity.
- The PGRM-SB2 comes with an in house Remote Receiver that has a range up to 200 ft., 12 volt Power Supply is included.
- New sensing technology provides less chance of false alarms.
- The Poolguard Model PGRM-SB2 is the only Floating Pool Alarm that uses Subsurface Detection Technology.
- The PGRM-SB2 pool unit is powered by a 9- Volt battery (not included), with a battery life of approximately 1 year.
- Low Battery Function: The PGRM-SB2 system will beep once approximately every 10 seconds when the 9 Volt battery is low.
- Works with all pools up to 20' X 40' or 800 square feet.
- The Poolguard Model PGRM-SB2 has been Certified by NSF International to the ASTM Standard Safety Specification for Residential Pool Alarms, ASTM F 2208.
- The Poolguard Model PGRM-SB2 is designed to detect intrusions similar to a one year old child.
- NSF-50 Certified for Material Safety.
